**PATIENT INSTRUCTIONS ON BACK**

## - PATIENT INSTRUCTIONS FOR MRI -

- There is no special preparation for an MR Scan. You may eat normal meals and take your medications as per your doctor's instructions.
- We recommend that you **DO NOT** drink coffee before your appointment. Women should not wear eye make-up.
- The exam will be completely safe and painless. You will not receive any radiation. You will lie still on a comfortable padded table to obtain images of the area of interest. This will take between 30 minutes to one hour.
- You will be asked to remove all jewelry and change into a gown and pants. A locked changing room is provided.
- If you are claustrophobic discuss this with your doctor. The doctor may prescribe a medication to make the exam easiest for you.
- If the answer to either of the following questions is yes, you **must** call us before your appointment:
  - Is there a chance you are pregnant?
  - Do you have a Pacemaker, Aneurysm Clips, Surgical Clips, metal implants or foreign bodies?
  - Have you had inner ear surgery or cochlear implant?
  - Have you had metal removed from your eye(s) or are you a metal worker.**  
(Please call us if yes - you will need x-rays of your eyes PRIOR to your exam)
